

A Special Offer for ADW Elementary Schools

The Coding Space Virtual Mini Camps

Looking for engaging activities for your child during winter break? Look no further! At The Coding Space, we're on a mission to help kids develop creative thinking skills, confidence, and self-expression through learning to code. Whether kids are new to coding or already proficient in programming languages like JavaScript and Python, our interactive, virtual coding classes and camps are fun for everyone. Our experienced instructors balance screen time using our signature 4:1 student-to-teacher ratio with hands-on activities, games, and opportunities to create and explore, even in your own home.

Camp Coding Space Online Includes...

WARM UP ACTIVITY

We'll kick-off with a warm-up activity like Price Is Right or Cool Hidden Talents.

PROJECT BASED CODING

Next, we launch into project-based coding time with our instructors there to guide and prompt problem solving.

HANDS ON, OFF-SCREEN ACTIVITY

Then kids take a break, reset, and recharge with a screen-free, hands-on activity.

ELECTIVE

Next, we'll dive into a STEM-based subject that encourages exploration and discovery, with awesome choices.

One offer code only, per transaction.
